Dates for the exams are fixed. Generally only students with a regularly scheduled class are accommodated at an alternate time. Anyone with a regularly scheduled class during these exam times should let me know as soon as possible. Make plans now to be certain these dates are in your calendar. Note that travel is not a sufficient excuse to have an exam scheduled on a different day.

Grading Policy: Student’s grades will be determined based on their “exam component” and their “section component”. The exam component depends on the grades you obtain in the uniform exams and web homework. The three uniform exams are worth 25%, 30%, and 40% of the exam component and the web homework (beginning with Chapter 2) is 5% of the exam component. The section component of your grade will depend on the grades you obtain from in-class quizzes and team homeworks. The final course grade will be primarily determined by the exam component grade for each student. However, for some students, the final course grade may be modified by the section component grade or the gateway exam. Visit the student guide at [http://www.math.lsa.umich.edu/courses/sg/] for a full explanation.

Homework: Daily web homework will be assigned from each section that we cover. The homework is done online at [http://instruct.math.lsa.umich.edu/courses/115/webhw/]. The due dates will be posted on the website. In addition, you will be given regular group assignments and 50% of your section component will be based on these group assignments. We will discuss the group homework arrangements further in class.

Quizzes: There will be short weekly quizzes. No make-up quizzes will be given, but I will drop the lowest two quiz scores when I compute your final grade. Quizzes count toward 50% of your section performance.
**Gateway Exam:** There will be one gateway exam covering differentiation rules and must be passed by November 12. The open dates for the gateway will be between the first and second uniform exams and will be announced later in the semester. Students will lose a **whole letter grade** for failing to pass the proctored gateway during the open period. Proctored gateways are administered in the gateway lab (B069 EH) and may be taken no more than twice per day. Students may practice the gateway from any computer at any time (and many times) during the open dates for the exam.

**Math Lab:** Free tutoring from the Mathematics Department.
