Office: 1061 EH Wed 2-3  

Calculator: TI-84 or equivalent. If you have another model, you will be responsible for knowing how to use it. Bring your calculator to class each day and to the Uniform Exams.

Course Web Site: http://www.math.lsa.umich.edu/courses/115  
This site has important information including the Student Guide and homework assignments. It will be updated with exam rooms and other information as the semester progresses.

Class expectations: It is expected that you will try your hardest and focus on the work while you are in class. This is out of respect to yourself, your fellow classmates, the material, and the instructor. It is expected that you will cooperate with your fellow classmates and spend time thinking about the math as well as how to explain the math.

Uniform Exams:

<table>
<thead>
<tr>
<th>First Exam</th>
<th>Second Exam</th>
<th>Final Exam</th>
</tr>
</thead>
<tbody>
<tr>
<td>6:00 pm - 7:30 pm</td>
<td>6:00 pm - 7:30 pm</td>
<td>10:30 am - 12:30 pm</td>
</tr>
<tr>
<td>Tuesday, February 9</td>
<td>Thrusday, March 25</td>
<td>Friday, April 23</td>
</tr>
</tbody>
</table>

Dates for the exams are fixed. Generally only students with a regularly scheduled class are accommodated at an alternate time. Anyone with a regularly scheduled class during these exam times should let me know as soon as possible. Make plans now to be certain these dates are in your calendar. Note that travel is not a sufficient excuse to have an exam scheduled on a different day.

Grading Policy: Students grades will be determined based on their “exam component” and their “section component”. The exam component depends on the grades you obtain in the uniform exams and web homework. The three uniform exams are worth 25%, 30%, and 40% of the exam component and the web homework 5% of the exam component. The section component of your grade will depend on the grades you obtain from in-class quizzes and team homeworks. The final course grade will be primarily determined by the exam component grade for each student. However, for some students, the final course grade may be modified by the section component grade or the gateway exam. Visit the student guide at http://www.math.lsa.umich.edu/courses/sg/ for a full explanation.

Homework: Daily homework will be assigned from each section that we cover. The homework is done online at http://instruct.math.lsa.umich.edu/courses/115/webhw/. The due dates will be posted on the website. In addition, you will be given regular group assignments and 50% of your section performance will be based on these group assignments. We will discuss the group homework arrangements further in class.

Quizzes: There will be short weekly quizzes, but no make-ups. I will drop the lowest two quiz scores when I compute your final grade. Quizzes count toward 50% of your section performance.

Gateway Exam: The Math 115 gateway exam covers differentiation rules and must be passed by March 18. Students will lose a whole letter grade for failing to pass the proctored gateway during the open period. Proctored gateways are administered in the gateway lab (B069 EH) and may be taken no more than twice per day. Students may practice the gateway from any computer at any time (and many times) during the open dates for the exam.

Math Lab: Free tutoring from the Mathematics Department. (East Hall B860)  

Hours:  
Monday through Thursday 11:00am-4:00pm and 7:00pm-9:00pm  
Friday 11:00am-4:00pm  
Sunday 7:00pm-9:00pm  

[Note: Any student with a documented disability should contact me as soon as possible so that we can discuss arrangements to fit your needs.]
