

Join us for the next talk of the **Math Club!**

Monday, December 5, 4:35pm, 901 Van Vleck

Balázs Strenner will talk about

Combing a hedgehog,
and other important practical problems

(No hedgehogs were harmed during the making of this picture.)

Is it possible to comb a hedgehog? And why should we care?

Surprisingly, the problem has been already considered in the 19th century and it has deep consequences in topology and analysis. We will discuss the ‘mathematical’ statement and sketch the proof.

As always, FREE PIZZA will be served!!
