References for stability theory

E. Hrushovski, Kueker’s conjecture for stable theories, Journal of Symbolic Logic, 54 (1989), 207-220. Kueker’s conjecture states that if every uncountable model of a countable theory $T$ is $\omega$-saturated then $T$ is categorical in some power.

G. Sacks, *Saturated Model Theory*, W.A. Benjamin (1972)

S.Shelah, **Classification theory and the number of non-isomorphic models**, North-Holland (1978).
