Textbooks:

1. Course Packet available in Van Vleck 1st floor lobby or 2nd floor front desk

2. There are additional texts you can use as references for the material covered in this class. Possible suggestions include both Taylor and Stewart Calculus texts which can be found on reserve in the math library on B2 or from various online retailers.

Grading:

1. **10% Homework Assignments** Homework will be assigned by Professor Bing Wang, to be due the following Wednesday in discussion. This will be graded partly on completion and partly on a selected few problems.

2. **10% Quizzes** There will be a biweekly quiz, given every other Wednesday, that will cover the material from the homework due the last two weeks (usually this will be one or two problems of a format taken from the homework). Quizzes will be short - 1 or 2 questions and no more than 20 minutes.

3. **50% Midterm Exams** There will be two midterm exams, check Prof. Wang’s website for details.

4. **30% Final Exam** Again, please check Prof. Wang’s website for details on the final.

**Late work:** No late work will be accepted, no makeup quizzes will be given. However, your lowest homework and quiz scores will be dropped.

**Calculator Use:** Calculators will not be allowed on quizzes and exams. There may be homework problems that require a calculator, and you are free to use a calculator on the homework, but becoming too dependent on one is a mistake.

**Classroom courtesy:** Please support your fellow students by doing your part to provide a classroom free of external distractions. Do not use your cell phone, listen to your ipod, work on a laptop (for anything other than taking notes), read the newspaper, etc. If you violate this policy you will be asked to leave the classroom.

**Academic Misconduct:** As a UW-Madison student, you have an obligation to conduct your academic work with honesty and integrity according to University standards. Likewise,
it is reasonable for you to expect that your fellow classmates are also following these stan-
dards. It is expected that all work that you submit will be your own, and that you have
actually done the work that you are submitting. Cheating will not be tolerated in this course.
It is unfair to your fellow students and it is disrespectful to me, your instructor. Should you
be found to be guilty of cheating, you will receive a zero for that exam or assignment and a
record of that misconduct will be filed with the Dean of Students office. In addition, other
sanctions may include removal from this course or expulsion from the University. Should
you observe a classmate engaged in academic misconduct, I would appreciate your bringing
this to my attention.

Special Needs: Please note: I wish to fully include persons with disabilities in this course.
It is in your best interest if you inform me as soon as possible regarding any special ac-
commodations in the curriculum, instruction, or assessments of this course that may be
necessary to enable you to fully participate in this course. Please be prepared to provide
me with documentation from the McBurney Center. Special accommodations for individuals
with obvious or documented disabilities require 2 weeks advance notice I will try to maintain
confidentiality of the information you share with me.

Caveat: I reserve the right to modify any part of the syllabus in exceptional circumstances
on an individual basis. If you have major life events that interfere with this course, please
contact the professor and me immediately to discuss your ability to complete required course
work.
